Software Engineering — Backend Development — AI Systems

Education

Vellore Institute of Technology (VIT), Chennai

2024 – 2028

B.Tech in Electronics and Computer Engineering

GPA: 8.17 — CGPA: 7.89

Technical Skills

Languages: Java, Python, C++, SQL

Computer Science: Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, DBMS, Computer Networks

Software Engineering: Software Engineering: REST APIs, Backend Development, Git

Frameworks/Tools: FastAPI, GitHub, Android Studio, ELK Stack

Databases: MySQL, PostgreSQL, MongoDB, SQLite

Problem Solving

- Solved 300+ algorithmic problems across LeetCode and HackerRank.
- Strong foundation in Data Structures, Algorithms, Dynamic Programming, Graphs, Trees, and Greedy Techniques.
- Regularly practice competitive programming and coding interview problems.

Software Engineering Training

Infosys Springboard — AI & Software Development Program

2026

- Completed intensive coursework in Java, Python, Software Engineering, Machine Learning, and Artificial Intelligence.
- Built hands-on projects involving backend development, APIs, and data processing workflows.

Projects

Sainik Sathi Mobile Application

GitHub

- Developed an Android application supporting secure AES-encrypted document management and OCR-assisted form processing.
- Implemented role-based authentication, automated PDF generation, and optimized database queries improving retrieval performance by 25%.
- Designed modular application architecture enabling scalable feature integration.

CivicLens AI

GitHub

- Engineered a FastAPI-based document verification platform integrating OCR and automated validation workflows.
- Designed scalable REST APIs for structured data extraction and confidence-based verification.
- Reduced manual verification effort through automated document processing pipelines.

Student Success Portal

GitHub

- Developed a full-stack analytics platform using React, Node.js, and MongoDB for activity tracking and performance analysis.
- Built backend APIs and database schemas supporting scalable student data management.

Research Experience

Passive LoRa Backscatter Communication System

- Designed low-power communication architecture leveraging RF energy harvesting.
- Explored scalable IoT communication mechanisms for energy-efficient sensing systems.

THz Metamaterial Absorber Research

- Simulated THz absorber structures and evaluated resonance optimization techniques.

Achievements & Leadership

- Contributor and Mentee, GirlScript Summer of Code (GSSoC) 2026.
- Top 124 College Ambassador, Techfest IIT Bombay 2025.
- Solved 300+ DSA problems across LeetCode and HackerRank.
- Active participant in hackathons, AI projects, and research-driven engineering initiatives.
